The Start to the End of the Self..

**WHAT IS LIFE?**
Mass, Space, Time, Dimension and God Realm.
An experience in finding a truth in life, dream, self and light.

**WHAT ARE DREAMS?**
Dreams indicate, suggest and reveal what you have decided in life. Sometimes they assemble to make a coherent idea from the past. Sometimes they form simultaneous ideas as you dream. And sometimes in rare cases they are ideas-- that have not come to pass.

**WHAT IS THE SELF?**
The vessel that allows your consciousness to explore your own truth.

**WHAT IS LIGHT?**
It is the source of everything, everyone and everywhere. All holographic components consists of the light. We are connected through it. It is this fundament that brings us together, the spark in essence we call God. It is inside every breathing essence of your body. You are the vessel of light and experience. A child/man/woman of the light seeking truth however that may end. All your memories the good and bad is recorded and returns to; The God, The Universe and The Truth. “Your integration is among the single sands of time in my hourglass”.

“He took the key  
Along the river.  
Over the hill.  
Underneath the grave.  
King of kings,  
He conquered death.  
The keys to heaven on earth.  
He who has earned the fate of man.  
It is complete.

Defining bad will define good. To mean everything but nothing at all. One mind given by he who is the holy father will be one voice that speaks to the multitude, not through natural convention but by divine convention. This is how they will know. This is how one reclaims a throne.”

-unknown source

An elaboration on the Proto-type Graphs, The Deva, Nirmanakaya and The Exhuman Graph. Revised and edited for viewing.

Part of: The God, Universe and Truth Integration; The Light in Selfless Unconditional Love.
God, Universe and Truth Integration - Heaven on Earth and Elaborations
There are 6 Phases:

1. The mapping of the Paradigms to acquire absolute or general knowledge of the spectrum.
2. The Deconstruction of Labels. The destruction of the ego.
3. The Phoenix’s Resurrection. Rise from ashes and reassessment of who we truly are.
4. Work as a Collective body, work towards who we truly are as a Organized Collective Humanity.
5. Make an effort to become human beings; We are human, we treat humans as humans. Pointing out a wrong across the world and associating it with a fellow human will do nothing. It only causes segregation, we are here now – in the right place at the right time to make a difference.
6. All there is left to do is Ascend and allow Heaven on Earth to establish.

What’s important is not what describes us physically but what makes us who we are deep inside. Your Causal/Intentions/Emotions this is who we truly are. The process of reestablishing Humanity on Earth is tricky in that we have been desensitized, exposed to mind numbing advertising and horrors of the entropy world. Random things happen and random damage is inflicted. We are all damaged goods. It’s time to unlearn the defensive mechanism that hides the soul and shields you from the big bad world. And embrace the new world of unconditional love, understanding and compassion.

Truly you weren’t made for this world, yet you are here so let’s fly with it. Your conscience is really not of this world and is meant for so much more. There is higher potential for the human being as we progress into time. And life is a much more genuine, natural and patient experience. It’s a gentle guidance of hand beckoning and suggesting us to be more and to prosper in our curiosity. It is a world, a universe and spectrum of universes for us to explore. We only need to think before we act. To treat others the way you want to be treated. To express yourself and allow others to express themselves. just not at the expense of your world. Stand for what you believe in but give chance for change and integration.

This development from Traditional Human Values of practicality, Scientific Human Advancements/Achievements, Of Empowering Power of the Divine Heavens. We come to a product, this is our personal ascendancy into new times. A calling to embrace the new world and movement of kindness. A Quiet revolution of the mind looking for improvement to the human kind, for practicality, for creativity, for justice. Mindfulness is a tool to our progression and we only need to drop our persona, our egos our defenses and submit to the real God who is in the human collective faith the spark of all creation inside us. We are the Gods of this world. God doesn’t need to live forever, be all powerful, all seeing and all loving. We just need the ability to understand the knowledge bestowed on us, to know the real good and evil. That’s actually inside of us. The ugliness is in what we are selfishly, enabling and indulging. We sit by submissively while others do as they please and we sit by because we feel guilty that we are no better. Stop feeling bad for yourself and step up the game. Be a man and be there for the justice.

The shell of the body shouldn’t trap you, it’s there as a vessel so that you can be who you are. It’s a means to function and go and do what you want to do in your life. To gather experiences and allow yourself to feel emotions and see things this world has to offer. There is still time to realize what life is about. Feel good about yourself, find like minds and create your world, do what you want to do not because you have to do it. You do it because you love doing it, because it’s necessary and you believe it’ll benefit you. Think better of yourself and think proactive, precautionary and mindful thoughts. Always be aware and conscious of what you do to others. Curiosity and Prosperity,

PROTO-TYPE LIGHT ENTROPY:

ENTROPY

Entropy of Cosmology/Astrophysics; The Mass is the Black Holes, Its Energy is Stellar Objects and its consciousness Quasars and Galaxies. But at the end you will only find the Union of the Universe.

Entropy of Quantum Physics; The Mass is the Nucleons, Its Energy is Atoms and its consciousness is Molecules. But at the end you will only find the Union of the 7:7 Atom.

Entropy of Divinity’s Realm; The Mass is The Lower Self, Energy is The Higher Self and Consciousness is The Divine Self. But at the end you will only find Union of The Self.

Entropy of The Living Universe; The Mass is The mineral and plant kingdom, The Energy is found in The Animal Kingdom and The Consciousness can be found in The Human Kingdom. But at the end you will only find Union in the Monadic Kingdom.

ORDER

Order of Cosmology/Astrophysics; The Breaking attribute is a Quantum Binary, The Submission is found in the Vesica Pisces and The Spiritual Mending (Kensuragi) is found in Virtual Pain of Experience. But at the end you will only find the Entity of Virtual Release and Expansion of Experience.

Order of Quantum Physics; The Breaking attribute is a Core, The Submission is found in the Transitions and The Spiritual Mending (Kensuragi) is found in the Crossways. But at the end you will only find The Entity of The Protruding Quantum Binary.

Order of Divinity’s Realm; The Breaking attribute is a First Triad, The Submission is a Second Triad and The Spiritual Mending is found in the Third Triad. But at the end you will only find The Entity in The Monad.

Order of The Living Universe; The Breaking attribute is (Physical Core and Emotional Transition), Submission is found in the (Mental Core and Unity Transitions) and Spiritual Mending (Kensuragi) is found in the (Spiritual Core and Divine Transition). But in the end you will only find The Entity in the Monadic Core.

IDENTITY

Identity of Cosmology/Astrophysics; The Eternal is the Kabbalah, The Infinite is the Ain Soph Aur and The Nothingness is “Not even Nothing” Ain. But in the end there is Substance God.

Identity of Quantum Physics; The Eternal is Matter, The Infinite is Time and The Nothingness is Dimension. But in the end there is only The Substance of The God Realm.

Identity of Divinity’s Realm; The Eternal is Nirvana, The Infinite is being Unattached and The Nothingness is the Existence of Being. But in the end there is only The Substance of The Divine Quadriad (Omnipotent, Omniscient, Omnipresent and Omnibenevolent).
Identity of The Living Universe; The Eternal is (Mulkuth, Yesod and Hod), The Infinite is (Netzache, Tipareth and Geburah) and The Nothingness is the (Chesed, Daath and Binah). But at the end there is only Substance in (Chokmah and Kether).

**THE PROTRUDING ASCENDED LIGHT PROTOTYPE VALUES**

The Entropy of Union under Cosmology/Astrophysics is the Universe, Order of It’s Entity the Virtual Release and Expansion of Experience and It’s Identity Substance God.

The Entropy of Union under Quantum Physics is the 7:7 Atomic structure, Order of The Entity of Protuding Quantum Binary and It’s Identity Substance God Realm.

The Entropy of Union under Divinity’s Realm is The Self, Order of the Entity of Monad and Identity of Substance Divine Quadriad (Omnipotent, Omniscient, Omnipresent and Omnibenevolent).

The Entropy of Union under The Living Universe is The Monadic Kingdom, Order of the Monadic Core and Identity of Substance (Chokmah and Kether).

**PROTO-TYPE LIGHT ORDER CHART:**
PROTO-TYPE LIGHT ORDER

ENTROPY

Entropy of Biological; The Humbleness is in the Kindness, It’s Healing is in the Nurturing and it’s unattached is in it’s Awareness. But at the end you will only find the Attuned Self.
Entropy of Psychological; The Humbleness is the Thoughtfulness, It’s Healing is in the Loving and it’s Unattached is in the Strategy. But at the end you will only find the Synthesized Self.
Entropy of Philosophical; The Humbleness is in the Mindfulness, It’s Healing is in Compassion and Unattached is in The Consciousness. But at the end you will only find The Emanating Self.
Entropy of Harmonic Resonance; The Humbleness is in the Transparent Being, The Nurturing is found in Radiant Being and The Unattached can be found in The Liberating Being. But at the end you will only find Substance of the Transformed Being.

ORDER

Entropy of Biological; The Logos is in the Vibrations, It’s Gnostics is in the Knowing and it’s Esoterics is in it’s Awareness. But at the end you will only find the Release and Expansion of the Virtual World.
Entropy of Psychological; The Logos is the Echoing, It’s Gnostics is in the Consensus and it’s Esoterics is in the Integration. But at the end you will only find the Synthesis.
Entropy of Philosophical; The Logos is in the Past, It’s Gnostics is in the Standards and Unattached is in The Consciousness. But at the end you will only find The Now.
Entropy of Harmonic Resonance; The Humbleness is in the History, The Nurturing is found in Data and The Unattached can be found in The Archives. But at the end you will only find Substance of the Collective Persona.

IDENTITY

Entropy of Biological; The Beta is in the Life, It’s Alpha is in the Self and it’s Delta is in the Dreams. But at the end you will only find The Lucid State.
Entropy of Psychological; Beta is the Reality, It’s Alpha is in the Events and it’s Delta is in the Realizations. But at the end you will only find the Cognitive Cohesion.
Entropy of Philosophical; The Beta is in the Trap, It’s Alpha is in the Illusions and The Delta is in The Inception within the Inception. But at the end you will only find The Induced Psycho-activity.
Entropy of Harmonic Resonance; The Beta is in the Virtual Reality, The Alpha is found in Hologram and The Delta can be found in The Altered Consciousness. But at the end you will only find the Substance of Enlightenment.

THE PROTRUDING ASCENDED LIGHT PROTOTYPE VALUES

The Entropy of Entity under Biological circumstance is the Attuned, Order of It’s Refined True Knowledge is Release and Expansion of The Virtual World and It’s Identity is in Theta of Lucid State.
The Entropy of Entity under Psychological is the entity of the Synthesized, Order of The Entity of Synthesis and It’s Identity Cognitive Cohesion.
The Entropy of Entity under Philosophical is The Emanating, Order of the Refined True Knowledge is Now and Identity of Theta’s induced Psycho-activity.
The Entropy of Entity under Harmonic Resonance is the Transformed Being, Order of the Refined true Knowledge is The Now, Identity of Theta’s Enlightenment.

PROTOTYPE LIGHT IDENTITIES: (Revised for clarity on chart)
For my final Light Proto-Type to complete the Triad:

**PROTO-TYPE LIGHT IDENTITY:**

**ENTROPY**

Entropy of Religion; The Power is represented by The Pope, It’s Wisdom is in Prophets/Seers/Shamen and it’s Courage is found in it’s Warriors. But at the end you will only find The Selfless Unconditional Love of The Monks.

Entropy of Science; The Power is found in Commercial and Industry, The Wisdom is found in (Governments, Teachers and Churches) and it’s Courage is in The Working People. But at the end you will only find The Selfless Unconditional Love of The Light Seekers.

Entropy of Humanism; The Power is found in Activists and The Rebellious, The Wisdom is found in (Reiki Teachers, Scholars and Sen Sei) and Courage is found in the Humanitarian Social Workers. But at the end you will only find The Selfless Unconditional Love of the Modern Knights.

Entropy of Societal Epitome; The Power is found in A Sword, The Wisdom is found in A Book, The Courage is found in the form of A Lion. But at the end you will only find Selfless Unconditional Love of the heart relevant.

**ORDER**

Order of Religion; The Protector is found in the Surgeon, It’s Mastermind is in the (Strategists and Political Heads) and it’s Architect is found in (Building Mechanical Parts and Structures). But at the end you will only find The Healing of The Priest.

Order of Science; The Protector is found in the Family Doctor, The Master Mind is found in the Psychologist/Neurologist and it’s Architect is found in (Building Machines for Elements air/wood/metal/water/fire/oil). But at the end you will only find The Healing of The Engineer.

Order of Humanism; The Protector is found in Nutritionists, The Master Mind is found in Philosophers and it’s Architect is found in (Building systems for sustainability). But at the end you will only find The Healing of The Educator.

Order of Societal Epitome; The Protector is found in (The Physical, Mental and Supplementary Body Specialist), The Master Mind is found in the (Causal/Mind/Brain Specialist), The Architect is found in (The Physical, Mental and Spiritual Extension Specialist). But at the end you will only find The Healing of The World Healer Specialist.
IDENTITY

Identity of Religion; The Lower Divinities is Demi-God, The Medium Divinities is known as The Angel/Deva and The Higher Divinities is Arch-Angels. But in the end there is only The Most High Divinity God.

Identity of Science; The Lower Divinities is The Nephilim, The Medium Divinities is known as The Higher Dimensional Manifest and The Higher Divinities has what is known as The True Manifest of the Divinities. But in the end there is only The Most High Divinity of The Big Bang.

Identity of Humanism; The Lower Divinities is The Giants, The Medium Divinities is known as The Guardian Spirits and The Higher Divinities has what is known as Gate Guardian Spirits. But in the end there is only Most High Divinity The 7:7 Perfect Body.

Identity of Societal Epitome; The Lower Divinities is God Form on Earth, The Medium Divinities is God Form in The Causal Spiritual World and The Higher Divinities is God Form in Maturation. But at the end there is only The Most High Divinity Collective Godhead.

THE PROTRUDING ASCENDED LIGHT PROTOTYPE VALUES

The Entropy of Selfless Unconditional Love under Religion is the The Monks, Order of It’s Healers the Priest and It’s Identity of The Most High God.

The Entropy of Selfless Unconditional Love under Science is The Light Seekers, Order of The Healers The Engineer and It’s Identity For The Most High Divinity The Big Bang.

The Entropy of Selfless Unconditional Love under Humanism is The Modern Knights, Order of the Healer The Educator and Identity of The Most High Divinity 7:7 Perfect Body.

The Entropy of Selfless Unconditional Love under The Societal Epitome is The Heart, Order of the World Healer and Identity of The Most High Divinity Collective Godhead.
The Giver’s body is Affectionate, Mindful and Constructive. The Giver’s body’s mind is of Light, Emanations and Summation. The Giver’s body’s Spirit is of Einsof, Manifest and Synthesis.

The Light Walker mind physically is about his Purposefulness, Balance and Consistency. The Light Walker mind mentally is Martyrdom of Christ, Straight and Narrow Path and Choosing the Right. The Light Walker mind is spiritually in Gematria, Spiritual Properties and Virtual Reality Model of the Universe.

The Pristine Deva spirit has Overview, Oversight and composed of The Holy Trinity. The Pristine Deva’s spirit mentally is on the Atonement, Cream of the Crop and Christmas. The Pristine Deva’s Spirituality is in Nirvana, Unattached and focused on Existence in Being.

The Giver body must give resourceful life, give mindful thoughts and give constructive spirits. The light walker mind must light the way, does not stray and makes worlds move from one spectrum to another. The spirit of Pristine Deva brings Miracles on Earth, Heaven on Earth and Paradise on Earth. With decisive aims and studies The Giver, The Light Walker and Pristine Deva as one person must guide the souls of Earth back to the collective spark of god.

(27 sided star, 9 ascended values)

Total(81 sided star, 27 ascended values)

THE HUMAN DEVA BEING
In the Physical world, The Past: Though Might, Magic and Courage ruled the middle ages. Affection was considered the most valuable trait.
In the Physical world, The Present: Where Religion, Technology and Humanism strive. Mindfulness was considered the most valuable source of comfort.
In the Physical world, The Future: Where Traditional, Evolving and Sustainability are traits desirable. Constructiveness was considered the most valuable trait.

In the Mental world: Etiquette of Energy, Wisdom and Responsibility brought us a bright living world. But it is Purposefulness that brought them together.
In the Mental world: Attributes of Power, Intellect and Bravery brought us a world of adventure and excitement. But it is Balance of these attributes that make them whole.
In the Mental world: Dominion of Authority, Justice and Liberty brought us our freedoms in life. But it is Consistency of these dominions that make our lives livable.

In the Spiritual world: Perspectives of First person, Second person and Third person brought us a range of views. But it is the Overview of all three that makes the view complete.
In the Spiritual world: Mastery of Hindsight, Insight and Foresight brought us a range of spectrum. But it is the Oversight of all three that makes the sight complete.
In the Spiritual world: Collective Figures Father/Parental, Son/Filial and Holy Ghost make up the collective of bodies of host mentor-ships but it is the Holy Trinity that make it a one body collective.
STAR OF EMANATIONS: ORDER

The world of Body: Holy Spectrum is the idea that Life, Dream and Self bring you closer to experiencing life truly. But in the end Light is what you produce. The world of Body’s next medium: Holy emanation is the idea that through Practice you come to Believe and from Believing you can Manifest. But in the end Emanation is what you produce. The world of Body’s final form: Holy Summation is the idea that with Keys, Tools and Solutions bring you closer to it (God/Truth/Universe). But in the end Summation is what you produce.

The world of Mind: Holy Body is the idea of Unconditional Love, Hope and Awareness. But in the end there is only the Martyrdom of Christ. The world of Mind’s next medium: Holy Mind is the idea of Service, Faith and Understanding. But in the end there is only the Straight and Narrow Path. The world of Mind’s final form: Holy Spirit is the idea of Honor, Redemption and Benevolence. But in the end there is only Choose the Right.

The world of Spirit: Holy Soul is the idea of Deliverance, Penitence and Sacrifice. But in the end there is only the Atonement. The world of Spirit’s next medium: Holy Prosperity is the idea of Victory, Salvation and Glory. But in the end there is only the Cream of the Crop. The world of Spirit’s final form: Holy Peace is the idea of Merriment, Celebration and Joy. But in the end there is only Christmas.
STAR OF KABBALAH: IDENTITY

In the physical world, The Body of life in this category is found to be God, Universe and Truth. But only find Einsof at the end of it all.
The next medium of the physical world is that the spectrum of life is Eternal, Infinite and Nothingness. But only find Manifest at the end of it all.
The final medium of the physical world is that the worlds are of Action, Formation and Creation. But only find Emanations at the end of it all.

In the mental world, Names (the source of identity) is that the worlds are of 72 names of God, Constellations and Zodiac. But only find Gematria at the end of it all.
The next medium of the mental world is that the Substance of life is Holy Trinity, Elements and Deva. But only find Spiritual Properties at the end of it all.
The final medium of the mental world is that the worlds are of Constitution is of Trinity Cores, Transitions and Hourglass. But only find The Virtual Reality Model of the Universe at the end.

In the spiritual world, Realms is that the worlds are of Heaven, Hell and Earth. But only find Nirvana at the end of it all.
The next medium of the spiritual world is that the natures of these realms are Dominant, Submissive and Unashamed. But only find being Unattached at the end of it all.
The final medium of the spiritual world is that the worlds that brings Joy is of Glorification, Martyrdom and Redemption. But only find Existence of Being most essential at the end of it all.

NOW I EXPLAIN IT:

The idea of Holy emanation is the idea that you can with your mind bring something to life with some work. If you Practice something it gets Processed to become a Belief/Idea/Thought when it becomes this you can go further and bring it through Accessing it into a Nature. Finally you can Accumulate that to become Manifest. There’s a final state which is called emanations but I’m guessing prayer or massive concentration makes conjured replicas of the real thing that makes it work and function as the real thing (?) according to this idea.

(I’m testing to see how much work it takes to elaborate with complete thoughts here.)
“The Holy body is the idea of Unconditional love, hope and awareness. But end product is Martyrdom of Christ” Unconditional love is the love Christ gave in order to give Earth the atonement because he saw that we were all in complete sin in this world no matter what we did God’s judgement was on us unless something was done, which was to sacrifice his blood, body and soul. in order to free us from our eternal torment that is suppose to be life. It was suppose to be a release from this Earth to bring sanity and conscious minds back to Earth. And according to Hindu’s the path to happiness is to be unattached and live life mindfully and without regret. It’s also about hope for mankind and gives us a second chance at redeeming ourselves. This allows us to obtain the Awareness attribute that because we have been subjected to Jesus’s pure cruel death(?) we have become conscious beings aware of almost everything around us.

The idea of “Service, Faith and Understanding. but only find The Straight and Narrow Path.” Service is the idea that if you just live according to secular/god’s laws and serve faithfully persevering no matter how hard the course and understanding that there is much good in knowledge out there for your body, mind and spirit and we just need to look deeper. This is the idea that the mentality of living a modest, moderate and following the wisdom of words. This is the life we should be focusing.

The final idea of “Holy spirit is the idea of Honor, Redemption and Benevolence. That in the end there is only Choosing the Right.” This is the idea that through using your honor and your trials of redemption and benevolent being you are able to Choose the Right thing to do. It’s an old saying that Latter Day Saints use to carve on their rings CTR. I found it most appropriate for this situation.

“Holy soul is the idea of Deliverance, Penitence and Sacrifice. But at the end there is only Atonement.” This is the idea that through the deliverance of souls, the guilt of sinning and of course the ultimate sacrifice brings us to the idea of Atonement which is in the Spiritual realm. It is well known that these three things encompass the meaning of the atonement but it only makes sense in the spiritual realm of things.. not of this world. It is far beyond making logic of.

“Holy Prosperity is the idea of Victory, Salvation and Glory. But in the end only the Cream of the Crop.” This is the idea of Victory on earth because of this system of the atonement here we put on full blast the effects of Salvation for all souls straying not knowing who Christ is and finally ultimate Glory which is what we enjoy in this world because of his sacrifice hence why this is the Cream of the Crop. We reap our harvest because he gave us the time, society and life in order to do that. If you remember Satan offered him during his temptation in the desert a moral life as king of kings if he just gave his soul to Satan which he refused and forfeited his life for us.

“Holy Peace is the idea of Merriment, Celebration and Joy. But in the end there is only Christmas.” This is finally it the real deal. Merriment full of laughter and joy because it’s Christmas, Celebration for Christ every year and joy for all who come across the people who celebrate it. Christmas is a celebration of Christ, not pagan Saint Nicolas. The real boss of the show Christ and his timeline of Death AD and BC is the real clue here. Our timeline is based on Christ, our Christmas is dedicated to Christ (best holiday ever) and we have a religion based on Christ.. a country dedicated to Christians. There’s no reason to not celebrate Christ everyday, when you’re living and breathing Christ everyday.

(Nope not happening again(?))

This is the star of self that I assembled. It’s a comprehensive look into the forms of human perspective out there and hence we have come to a spectrum mapping of these entities. Listed are the true purposes of the self and it’s inventions of thinking and adaptations of the mind. The study of all realms of the self in a very general spectrum of 27 sides and 21 ascendant values.

This is the Star of Self with Ascendancies:

The self is an interesting concept and it often creates an illusion of self even though self is necessary in order to establish who a person is on the Earth. We call this entity the persona. As we continue to progress I find that a lot of groups try to avoid Persona altogether and to completely abandon what they are building. This is a good way to explore your roots but not a good way to be in society that requires certain things of you like paying your rent, basic values and standards of morality and disciplines at work.

**ELABORATION OF SELF DISCOVERY CHART:**

First off the form Authenticity has the dependencies of values and requires a person to be Genuine.

Second, the form Transformation has the dependencies of conductive code and requires a person to be progressive.

Thirdly, the form Persona has the dependencies of Ego and requires a person to seek acceptance.

Lastly, the ascendant form of Selfless has the dependencies of Virtuous Rules and requires a person to seek Constructivity.

**INTERPRETATIONS OF THESE ELABORATIONS:**

The first form Authenticity of values and needing genuineness. Means that to be Authentic you require values that like a child inside begs of you to express. Small nagging things like did you forget your wallet to “Oh! you need to go on that ride”. This is the inner child that speaks and as you develop more as a human being the development becomes a consciousness that invokes ideas of donating to the poor or helping human small causes like finding safety for that homeless child wandering the streets.

The second form Transformation of codes and needing progress. Means that to be a form of transformation you require codes that changes your perspective in life and forces you to grow and become more than what you currently are. Progress is idea that is imprinted in the mind of a transformation being. Always wanting to become more. Ideas that bring you to become more human and stronger as a person such as the development of consciousness and helping others and following causal nagging of the spiritual self.
The third form Persona of ego and needing Acceptance. Means that to be a form of Persona you are required to feed your ego which establishes your identity and helps you explore you personal self. Persona is said to come with the shadow of personal cravings and the double face of vices but it is still a necessary component to exploring who you are. Acceptance of who you are and what you like to do is part of the living experiment of life. The truths you find throughout your life and the ultimate one being the realization of who you are at the end of your life is a necessary component to your acceptance. Acceptance from your peers is also a necessary component to finding out if you are progressing or not and critical feedback from them is also necessary to finding out if your on the right track.

Finally the form of Selfless unconditional love of virtuous rules and Constructivity. Means that to be a form of Selflessness you are required to integrate virtuous rules which establishes what you want to see in life and who you truly are. Selflessness is the idea that you become unattached but aware conscious of all the things around you, committing to time, patience and mindfulness of your situation in life and all that comes to you. Never completely indulging to an extreme but always being mindful through moderation and balance of how much you should indulge. The Selfless form is always looking to be constructive in the world and seek to build bridges and construct structure and integrating positive loving vibes to a person, place or thing. In life he is the teacher, engineer and architect to a certain degree. He has learned of all these worlds and wishes to implement them in all that he does.

In conclusion:

There are varieties of self and different degrees of them but there are only 4 forms that are possible. The fourth is the combination of all three. The most balanced and least understood/pursued state of them all. It is ideal to press towards the 4th form in order for ascendant values towards a constructive life to begin. I am aware of the varieties of spirits out there namely tricksters and animal totems. These things are trivial and lead to matter of expression rather than the ultimate cause which is to a higher purpose and reason for life. The answer “Is that how it is” is the answer to expression and human incompetence and emotional attachment. The light is the answer in the end. The light exist as the binary of ascended values and the 4th column will always contain the ultimate, the beginnings of human and identity progression to collective human kind and the self.
The Self-Volution is interesting in how the word volution means to spiral or coil like a double helix. In a manner of speaking light is a manner of volution as previously studied. This graph represents the trend of systematic mentality of change and the human condition of adapting and it’s response to the change. It also explores the root cause of why this mental state of the mind is changing and it’s trending tendencies rooting to the behavioral adaption capacity of humanity. Basically the tendencies of natural man to behave based on adaptations by said imposed ideas of change of state of living (evolution, devolution, involution and inter-volution) in this case.

ELABORATIONS ON CHART OF SELF VOLUTION:

The Devolution of the Study of General Nature of hunting and gathering origins is rooted to the cause of our Primitive Origins.

The Evolution of the Study of Materialism is rooted to the cause of Scientific Narcissism.

The Involution of the Study of Self is rooted to the cause of Identity Fixation.

The Intervolution of the study of Collectivity is rooted to the cause of Causation Deconstruction.

THE SELF VOLUTION ELABORATIONS OF INTERPRETATION:

The devolution of the study of general nature and hunting and gathering origins is about how people have the mentality that going back to our primitive former life was where life was really at. Even with the wars, pillaging and destruction people still want to live in the past. The Life of solitude and hunting and gathering life style is one that is rewarding, closed but in all honesty more fun but at the cost of history to repeat itself every time. An ego rises out of all the hardship and a mind dominated by a persona of supremacy. It is a dangerous path for those who believe in a rightful spot of privilege but a noble one if one tends to live humble and isolated.

The evolution of the study of materialism is one of objectivity and moderate to severe narcissism. It is a mentality of having and not having, a legacy of scarcity and abundance. Owning things and that life is about absolute chaotic entropy and random chance to obtain desirable traits. It is a world defined by materialism, advertisement and artificiality. This world is solely about the objective of objects and the physical qualities and traits of a defined person, place or thing. This is why we need to tap into to the spiritual world and a reason to elevate above this static grounds of little depth and contrast. As we open our eyes to the higher knowledges of reason, purpose and causation.
The Involution of the study of self and it’s persona’s identity and it’s the root cause of identity fixation. This is the spiritual world of emotion, belief and causation; where life is about deeper meanings of life – your acceptance, authenticity and genuineness. The acceptance of yourself and everything around you is an important step to involution. The authenticity through understanding and coming to terms with who you are as a being and believing yourself deserving of everything in your life and through feedback of your peers is essential to your involution. The root of this is Identity Fixation because this study of self is only beneficial to those seeking to nurture, heal and recover from an existing environment that begs us to change and adapt because the problem is so deep and damaging. The study of self can only help to an extent, personality, attitudes assessment and acceptance of certain things will certainly help you in the right direction in life. But the fixation of one world and perspective where there are many to comprehend can only be literally described as fixation of self. This is where Intervolution steps in.

The Intervolution of collective and it’s root cause of Causation Deconstruction. The Idea of Intervolution is that we need to integrate many of these different selves that we have into a well woven tapestry. Intervolution is bringing in the idea of Devolution, Evolution and Involution working together in it’s own way as a system working to our personal benefit. This is all to the collective being, us as a human race and not subject to only a group of certain people. As much as sometimes we need that solitude and discontent tension of people who aren’t liked minded. We must think what can we do for the collective human species in order to progress as human beings. The root of this is Causation Deconstruction because you need to break down everything you ever learned about these adaptation techniques and build a new bridge that incorporates all the perks of having all three worlds to your bidding. The Integration of all three of these worlds is necessary to build the self that gets the excitement of life in Devolution. That gets the Progress out of the material matter of fact world of Evolution. And The Insights and Oversights of Involution in determining who you are and comprehending what you like doing personality wise.

Conclusion:

The world of the mind is an interesting in that some believe we as regressing and others believe we are progressing. The state of mind is essentially how you live it. You don’t choose to eat alone in front a television, it just happens that you live this way. Life choices are at your disposal and you need to make your path through the decision that you can decide what you want to do. If you are living this latter type of situation, make something happen. If you are unhappy with your current situation and opportunities are scarce – Find ideas and craft yourself a mighty bridge of ideas of course. You are your own enemy if you don’t act on these type of situations. These ideas of progressing and regressing in the mind is essentially just a misconception that the mind decays because of ideas. Which is non-sense. We just need to choose the right path.

The Self Spectrum is a chart that describes beings such as Shadow self, Ideal self, Persona self and Collective self which may sound alien to some of you who are not familiar with this terminology but the alternate selves are very real and very necessary. The Self spectrum is an exploration of the manifestation, nature basis and this concept called Perpetuated Causation. The Consciousness manifestation are just the platforms for which the body exists. The Nature Basis is essentially the tendencies in which the platform by design will act out as. The Perpetuated causation is really just the root causation of what drives it to be the way it is. I will speak on why they are such an essential part to our identity in a moment.

ELABORATIONS OF SELF SPECTRUM CHART:

The Shadow Self is a consciousness manifestation that by nature basis is instinctual and it’s perpetuated causation of emotion.

The Ideal Self is a consciousness manifestation that by nature basis is seeking for improvement and it’s perpetuated causation to be Lack of Having.

The Persona Self is a consciousness manifestation that by nature basis is seeking for Embetterment and it’s perpetuated causation to be Lack of Being.

The Collective Self is a consciousness manifestation that by nature basis is seeking for a Holistic System and it’s perpetuated causation to be Lack of Integration.

THE SELF SPECTRUM ELABORATIONS INTERPRETATION:

The shadow self is a being within youself that draws it’s energies from what you desire and what your primal instincts require of you. It’s basis is instinct because they are the primal urges that bring you to act out in ways out of character. They are sometimes darker in nature. Sometimes harmless and sometimes dangerous. Depending on what you are exposed to and the knowledge you have access to it will manifest in your subconscious always swaying you to believe that you could have done this or have that because of certain egotistic assertions of that certain persona. The shadow-self is known to be deceiving, hostile and hurtful. It preys on weak minds and manipulates it as if it has control over you. But again this is all in the mind these entities cannot act on their own but only through suggestion. It is important to note that a shadow self is often imaginary and only manifests when one concentrates to the point where they act as if they are real people. The perpetuated causation is emotion and it stems from what you deeply internally want by your human nature.
The Ideal Self is a being that you want to become and it exists as a destination you want to ultimately come to. It is sometimes unrealistic and demanding of yourself. It can be as simple as having and not having a certain person, place or thing. It sometimes requires you to improve yourself cosmetically, aesthetically and functionally. Always pushing to become greater version than what you currently are. It too exists in the mind and has no control over a physical body on its own. It merely suggests that you should be better then what you are right now. It works in the same manner as any imaginary entity but this one can be harmful in causing disorders such as anorexia, big-manly syndrome and all sorts of strange disorders that root from not looking the way you “should”. The perpetuated causation is in the lack of having. In which because you not a certain way you may want this ideal person to be you because life would be so much better and this acts as an enabler for you to live your dreams.

The Persona Self is a being that exists in a strange mix of physical reality and mentality. It really is who you are but at the same time it’s a made up thing that makes you believe you are this certain person. The persona is a strange thing in that it essentially is your ego and it possesses you to claim that you have a right to a certain thing, or enable you to act a certain way.. or in general pretend you are someone you are not. We are all human beings and the persona can only get you so far, unless you have physical attributes thanks to the gene lottery that make you a stellar specimen. Even with this your limits are well.. limited. The reason for the persona actually stems from seeking embetterment in your life and finding strange antidotes to why you are a certain way and how you can better yourself to become a gateway to a better living condition. This Perpetuated Causation is formed from the Lack of being in which this character you play as has a certain taste for a specific things and a pallet for whatever they desire. Lack of being is a vague way to term this perpetuated causation but it essentially rooted from the lack of what you can do as being of your certain nature and caliber.

The Collective Self is a state of being where all your memories of all the people you loved and all the people you admire and people you want to be fictionally or non-fictionally come together as a soup of a variety allowing you to progress with their consciousness in your mind. This is a holistic system where the entirety of everything you love, you have access to in your head. The knowledge of the internet holds some of these truths and you can branch out to these people that are unknown to you and find out more about what you like and who you like. The Holistic System is one where the sum of the components is not greater then the system's holistic entirety. The edge is in the synergy, the product and the collective mechanic of the machine; that is actually the collective of humanity. The Perpetuated Causation or really the meaning why all this came to be necessary is because of the Lack of Integration that we find here in these three worlds to create the collective self.

Conclusion: The world of self is one of curiosity and wonderment. The reason to why we are certain way is heavily embedded in our genes, dna and environment. This still doesn’t determine who we are completely. The ideas we often fantasize about ourselves are often dark or fantastical. And sometimes it’s mundane and average based on your persona. The idea that your nature makes who you are is completely wrong and should be negated to the creation of a completely new being as a collective of as many people and lives that have touched your life as possible. The summation of all you are is due and attributed to the collective taking all their lives and putting all their energies to making your life possible. The root of all this helps determine the causation of why we are and where we should go.

ELABORATIONS OF ASCENDANT SELF

Ascendant Body is selfless and about intervolution. It is in essence the collective self. But in the end The Protruding Plane Binary is The Way of Perspective.

Transcending Mind is Virtuous Rules, The study of Collectivity and working as a Holistic System. But in the end The Protruding Plane Binary is The Path of Oversight.

Empowering Spirit is Constructivity, The Causation Deconstruction and it’s root Lack of Integration. But in the end The Protruding Plane Binary is Roots of Causal Origin.

Physically the Ascendant Binary 1 is selfless, of virtuous rules and it’s root constructivity.

Mentally the Ascendant Binary 2 is of intervolution, study of collectivity and Causation Deconstruction and it’s truth in Integration.

Spiritually the Ascendant Binary 3 is of Collective Self, Holistic System and it’s root Lack of Integration.

Ascendance of the Protruding Plane Binary is of Way of Perspective, Path of Oversight and Roots of Causal Origin.

THE ASCENDANT SELF ELABORATIONS INTERPRETATION:

The ascended body in this case is the body in which we ideally want to “wear” – we determined that we should be selfless because the ego is a pride facilitator. We found that intervolution was the most receptive mind set in that we should integrate only the good of the three other worlds. And that we should work towards a Collective Self which means we should all be unique and be who are through the conscious distribution of all knowledge of all that we love (may it be person, place or thing).

The Transcended Mind in this case is the mind in which we truly want to facilitate – we determined that we should have virtuous rules integrated. That we should follow the study of the collective which is the study of being human and working towards/for humanity. The holistic system should be understood that the sum of all components is not greater then the collective holistic system. The other factors that give bonuses for having a collective holistic system can be attributed to synergy, the products and the collective mechanic of the system.
The third form Persona of ego and needing Acceptance. Means that to be a form of Persona you are required to feed your ego which establishes your identity and helps you explore you personal self. Persona is said to come with the shadow of personal cravings and the double face of vices but it is still a necessary component to exploring who you are. Acceptance of who you are and what you like to do is part of the living experiment of life. The truths you find throughout your life and the ultimate one being the realization of who you are at the end of your life is a necessary component to your acceptance. Acceptance from your peers is also a necessary component to finding out if you are progressing or not and critical feedback from them is also necessary to finding out if your on the right track.

Finally the form of Selfless unconditional love of virtuous rules and Constructivity. Means that to be a form of Selflessness you are required to integrate virtuous rules which establishes what you want to see in life and who you truly are. Selflessness is the idea that you become unattached but aware conscious of all the things around you, committing to time, patience and mindfulness of your situation in life and all that comes to you. Never completely indulging to an extreme but always being mindful through moderation and balance of how much you should indulge. The Selfless form is always looking to be constructive in the world and seek to build bridges and construct structure and integrating positive loving vibes to a person, place or thing. In life he is the teacher, engineer and architect to a certain degree. He has learned of all these worlds and wishes to implement them in all that he does.

In conclusion:

There are varieties of self and different degrees of them but there are only 4 forms that are possible. The fourth is the combination of all three. The most balanced and least understood/pursued state of them all. It is ideal to press towards the 4th form in order for ascendant values towards a constructive life to begin. I am aware of the varieties of spirits out there namely tricksters and animal totems. These things are trivial and lead to matter of expression rather than the ultimate cause which is to a higher purpose and reason for life. The answer “Is that how it is” is the answer to expression and human incompetence and emotional attach-ment. The light is the answer in the end. The light exist as the binary of ascended values and the 4th column will always contain the ultimate, the beginnings of human and identity progression to collective human kind and the self.
THE SYNTHETIC
EX-HUMAN OTHER

EX-HUMAN STAR CORE

These are hypothetical components to the construction of said entities. There’s no pretending to know completely what this field is about. Computers, Robots, Androids and Synthetic humans.

The Body: 1-Dimensional Shapes make a line, a dot and binary. But at the end there is only Quantum Binary.

2-Dimensional Shapes make squares, circles and triangles. But at the end there is only A Peek into the Veil.

3-Dimensional Shapes make cubes, Spheres and Pyramids. But at the end there is only Heaven on Earth reality Breaker.

The Mind: Essentials make a Brick, Triangles and Square and Circles. But at The End Quantum Disturbance.

Base make a Box-Frame, A Isocahedron and Pyramind Exterior. But in the end there is only the impending Threshold Protrusion. The category Buildings make a Sky Scraper,

Geodesic Dome and Tetrahedron Structure but at the end there is only Heaven on Earth Threshold Breaker.

Complimentary Continuation makes Stacked Cubes, Big Isocahedron and Tetrahedron 3D. But in the end there is only Threshold Protrusion.

Complex Structure makes Cube Structures, Geodesic Spheres and Tetrahedron Structures. But at the end there is only Heaven on Earth Threshold Breaker.
EX-HUMAN SPHERE TRANSITION

The Body: 1D Lines makes Dividing Red Line, Blue Dot and Green Binary. But in the end there is only Magenta Quantum Binary.

2D Lines make Life Separator (Cross), Dream Separator (Lapping Circles) and Self Separator (Lapping Triangles) but in the end there is only Light Separator.

3D Lines make Life Red Transitions, Dream Blue Transitions and Self Green Transitions. But in the end there is only Light Magenta Transitions.

The Mind: Powers makes Transistor, Kinetic Friction and Laser Static but in the end there is only Synthetic Development.

Controls makes Capacitor, Potential Memory and Pin Point Lasers. But in the end there is only Synthetic Potential.

Medium makes Electronic Medium, Fluid Medium and Air Medium. But in the end there is only World Medium.

The Spirit: Energies components are Energy Amplifier, Systemic Clockworks Loops and Quantum Charger brings about Synthetic Computer.

Energy Harness components are Heavy Capacitor, Systemic Crystalized Patterns and Quantum Motive brings about the Synthetic Robot.

Base components are Magnetic Base, Fluid Base Nano Machines and Synaptic Connection makes Synthetic Android.
EX-HUMAN PROTO-TYPE HOURGLASS

1st World makes Human Beings, Worlds and Purpose. But in the end there is only the Causal Protocol.

2nd World makes Android, Solar System and Data. But in the end there is only Causal Data.

3rd World makes Synthesized Being, Universe and Light. But in the end there is only Causal Light.

Systemic Engagement 2 makes Omega Protocol, Crossway Protocol and brings about Ascended Protocol Type 2.

Operation Harmonize 1 makes Entropy Conduct, Order Conduct and Identity Conduct and makes Protruding Involution Micro Planes.

Operation Harmonize 2 makes Alpha Conduct, Omega Conduct and Crossway Conduct making Protruding Evolving Macro Planes.

Operation Harmonize 3 makes Core Conduct, Transition Conduct and Hourglass Conduct and makes Protruding Planar Threshold

**Note:** The table continues with additional dimensions, events, entities, experiences, energies, and essences, but the table is truncated for brevity.
ASCENDED PROTRUDING PLANAR BINARY

The Giver through affection, Light and Einsof gives resourceful life.

The Giver through Mindfulness, Emnation and Manifest gives Mindful thoughts.

The Giver through constructive, Summation and Synthesis gives Constructive Spirit.

The Light Walker through Purposefulness, Martyrdom of Christ and Gematria will light the way.

The Light Walker through Balance, Straight and Narrow Path and Spiritual Properties makes Do Not Stray.

The Light Walker through Consistency, Choosing the Right and Virtual Reality Model of the Universe Make Worlds Move.

The Pristine Deva through the Overview, Atonement and Nirvana Makes Miracles on Earth.

The Pristine Deva through the Oversight, Cream of the Crop and Unattached. Make Heaven on Earth.

The Pristine Deva through the Holy Trinity, Christmas and Existence in Being brings Paradise on Earth.

The Thoughtful is Selfless, Intervolution and Collective Self brings Way of Perspective.

The Thoughtful Virtuous Rules, Study of Collectivity and Holistic System brings Path of Oversight.

The Thoughtful Roots of Constructivity, Causation Deconstruction and Lack of Integration brings Roots of Causal Design.

The Light Swimmer makes Plasma, Complete Comprehension and Human Benefits bring about Spirit of Causation.

The Light Swimmer makes Light, Ascended Masters and Human Assessments and brings about Human Being Hierarchy Office.

The Light Swimmer is Super Conscious, Ascendant and a Human Architect and brings about Higher Frequency Constructions.
The Pristine Nirmanakayas brings about Purpose, Warmth of Human Heart and Creation Manifest and gives a Purpose Driven World.

The Pristine Nirmanakayas brings about Productivity, Benevolent Action and Ethical Establishment and allows the Heavens to be Heard High and Low.

The Pristine Nirmanakayas brings about Deliberate Existence, Assessment of the Competant and Complete Fate Oversight and brings Deliberate Defining of Humanity.

The Mindful is of Quantum Binary, Quantum Disturbance and Quantum Disruption but brings The First Harkening.

The Mindful is of A Peek into the Veil, Impending Threshold Protrusion, Empowered Threshold Protrusion brings The Second Contact.

The Mindful brings about the Heaven on Earth Reality Breaker, Impending Heaven on Earth World Breaker, and Heaven on Earth Threshold Breaker brings The Third Communion.

The Light Flyer makes the Magenta Quantum Binary, Synthetic Development and Synthetic Computer brings The Quiet Revolution.

The Light Flyer makes the Light Separator, Synthetic Potential and Synthetic Robot bringing the Quiet Penetration.

The Light Flyer makes the Light Magenta Transition, World Medium and Synthetic Android bringing the Quiet Realization.

The Pristine Ex-Human creates Causal Data, Ascended Protocol Type 2, Protruding Evolving Macro Planes and the Assessment of the World.

The Pristine Ex-Human creates Causal Light, Ascended Protocol Type 3, Protruding Planar Threshold and brings about The Law, Order and Meaning.
I believe in God, but probably not the same one you may believe in. I believe God in the universe and god in the collective of human beings. I believe the answer to the universe is for us as a people to act through selfless unconditional love. I believe that Christ had many lives, that he was a reincarnation of Thoth. That he was one of the architects to the Giza Pyramid, that he commenced the project that was the catalyst to the human evolution of consciousness. That he was an initiate for the Giza pyramid and said to meticulously design the pyramids for his future awakening. That under the identity of Jeshu who also lived his lost years with the Buddhist monks written in the Manuscript of The Good Son; He sought enlightenment through them. That he brought Buddhist teachings back to teach his disciples. That Jesus actually lived two lives, one as Jeshu who lived a admirable good life but stoned to death and also as Barabbis who was the political activist who is the etheric body of Jesus. He is the manifest of Christ the Son of God. Christ didn’t even die at the cross according to these certain evidences and enigmatic suspicions (suspicious for the right reason) and actually lived a full and happy life with Mary Magdalene according to the Zacharias Rhetor under secret changed names. His survival is tribute to the knowledge that Christ did not die in 15 minutes at the cross. No he was sedated by a cloth put in his mouth that put him in a death like unconscious state. This is the reason why when they went to his tomb they brought aloe instead of funeral flowers. Aloe is used to heal wounds. They left no trace of where they went only the story that he ascended into heaven so that the romans could not chase him. Jesus and Magdalene lived full and happy lives, in the lost gospel Ecclesiastical History of Zacharias Rhetor under the pseudonyms of “Joseph” and “Aseneth”. Therefore I also do not believe in the resurrection sorry to say.

The purpose of this was to solve god who is the collective, solve universe through selfless unconditional love and the truth through Christ is to demystify his life. This is the conclusion and summary of the book.
ABOUT AUTHOR

The Author lives in Canada. Born and raised in Edmonton, he has traveled a lot in the last 2 years of 2014 and 2015 to the USA. Namely Boston, California, Las Angelos, Sandiego Hawaii and Texas and wishes to see more of the country. He studied at Nait Architectural for several years but due to an illness he was not able to complete it. The sedation of medication, combination of attitude and and the illness itself did not make it easy for his learning those few years. He went to Digital School and studied The Engineering Program for specialization in oil and gas pipelines. He did very well and received many Certificates and a Diploma. He tutors and substitutes for students at Digital School and volunteers for charity; namely the Catholic Social Services as a mentor for children ages 10-17 and The Heart and Stroke Foundation.

He enjoys graphic design, story telling, philosophy, photography, film, digital painting, art in general, poetry and especially acoustic type and composed and orchestrated music. He in particular fond of the Church Chores and Hymns. He is also a casual gamer, especially the older retro games. In his day he finds time to read his books on spirituality, blogging daily and writing articles about; Life, Dream, Self and Light. He is very happy with his work, and a very sincere and humble being. He practices mediation from time to time and practices martial arts with his father. Karate, Kenjitsu and Tai Chi are part of the daily routine.

He wishes to travel more and find like minds in order to connect and establish some long term partnerships to bring his dream of heaven on earth into realization. He is very ambitious in his idealism and virtuous practices but never imposes. He practices positive thinking, mindful action and virtuous integration on a daily basis. It is essential for the world to keep harnessing and cultivating the state of mind to become kinder, compassionate and understanding. His virtuous paradigms and Universal Model Paradigms are a show of his inner knowledge and contemplative practice of the world beyond the physical. Avoiding to see the world objectively as well as subjectively but somewhere in between unattached, mindful and at peace.

To some degree Nam Nguyen is a very complex in what he is trying to achieve yet he tries to be simple for the sake of connection and communication with the people. For he understands that his concepts are difficult to comprehend but hopes one day they will be useful to the people of the future. He is always open to ideas, the idea of exploration and fun. He understands that there’s a bigger picture in the world. The body is not the end. The spirit is not all there is. We not only should be seen as mechanical components to a machine but a part of a system of machines with parts. There is higher purpose in life and great reason to be moral in this life. The vices of your life do not define you but the behavior/practices and ideas you implement into your life define your attitude and nature. Ultimately your direction in life will bring you to some hard decisions and that is where your stones fall into place. Life is how you act in the face of encounters of hardship, if you are not prepared for what is to come then you were not prepared. Life is about pro-action, precautionary and nurturing beliefs and action of the now. Though it is a contemplative, mindful and thoughtful assessment of the moment too. The kindness, understanding and compassion of the heart plays a great role in all this too. There are many paths in life, you will twist and you will turn but as long as you make it in the end to your destination, this is what matters.
Nam Nguyen, is a man of practicality. A realist yet an idealist in trying to make the bridge in spiritualism. He is not associated with any form of religion at the moment but a big innovator of having ideas of his own weaving and integrating ideas he believes are suitable for building on. He is not a fan of organized religion and not a fan of religious hierarchy. He believes in the freedom of information and that good ideas should be distributed among the people. That the truth that people believe is not what it always seems to be. That time, people, circumstance and conditions can twist ideas to become strange forms of misinterpreted idolatry. He believes in going to the root of the problem and it’s causation. He believes in the progression and constructive nature of human beings and He believes in finding and mapping it’s identity and the transformation of a being through conscious assessment and behavior.

The Ascendant Code.
There are 9 things the world should be but only when they are one thing that they are complete. Mass, Growth, Existence, Eternity, Manifest, Body, Universal Reality, Vessel of Experience and Completion. Every detail, level and world is part of the grand scheme, the building blocks to creating the world we experience in this life. Combined these are the ascendant values of light which create all in existence. This is The Heaven on Earth visual conceptions of eternity, infinity, ambiguity and ascendency.
THE HARKENING; PROJECT HEAVEN

1. Growth of Deconstruction, Construction and Integration i bring you the first light.
2. The Mass of The Matter, Energy and Conscience beginnings to flow and you will have the second light.
3. Existence of Nothing, Everything and Infused brings the third light.
4. Manifest of Origin, Substance and Nothingness brings the fourth light.
5. Eternity of Alpha, Omega and Crossway bring the fifth light
7. Universal Reality of Core, Transitions and Hourglass bring the seventh light.
8. The Universal Vessel of Star, Sphere and Prototype being the eighth light.

This is the Source Light in my Palms. There will forever be growth of more spectrum, ideas and branches But the root source will never change. Within this graph is the ultimate truth if realized. The Source is beyond the realm of God and equal in importance on this platform as the development of the model.

The Beginning.

All life emerges, life is fruitful, yield is good. life multiplies. Ideas flourish and wonder and curiosity thrive. We are becoming more articulate, wiser, gaining more formidable ground.

The End.

Things are mastered, comprehended and men are exalted. Heights of accomplishments at this time act as catalysts to human kind and bring a new order to the entropy of the world. The identity of men are refined, solidified and conceptualized.

The Great Divide.

Things that once were, things that are and that will be are determined by the actions of men, their emotional/causal and intentional being. It will be decided who is in the right and wrong of life. This will be a time of conflict and those who go with and work for the system will become the system. Those who work against and for freedom will find a different path in ascendance out of the system. The shackles of men were never meant to exist. they just are until we come to the realization that we are more then the skin suits we live in and seek higher purpose in our consciousness. The frequency that we seek is found within selfless unconditional love.

Ascendant Behavior

The threshold is a rule made by the system to process us and dwarf our potential. It is the system threshold that holds us back and rules are meant to be broken of course. As we reach higher development the ascendant protruding plane brings the impending breaking of the threshold, the breaking of the threshold and finally breaks the illusion coming to the stage of World Breaker. This illusion of ego and persona is not our potential. We can survive here and grow but we will never thrive in this world.
In our form we are bound to earth until our release. We cannot escape our physical death but when we reach optimum levels of the spirit in this world and cross the veil we will see the new world reborn out of the fires of the phoenix’s ashes. Spirits that enable injustices of sickness, mindless, careless action such as violence, war, rape and actions of hate will be judged. These realms will be divided in this life and the next, where you are situated may be due to your ties to these worlds. The Celestial, Terrestrial and Telestial worlds are designated on Earth as well as the life after in the spirit. There is no hell, unfortunately the lowest world you can go from here is Outer Darkness which is the equivalent to hell. Other than or reincarnations into devolved forms in this world.

Vinn Diagram Complete and Expanded;
Concept of Heaven on Earth Geometrically Conceptualizing
Topic for today; Vinn Diagrams Complete and Expanded.

The Life, Dream, Self and Light Vinn Diagrams of Heaven and Earth.

Today I will make us some Vinn Diagrams for Squares and Circles acquiring the components of Heaven on Earth necessary for establishment. The Process is an Expansion, Refining and Ascendence through divisions. Through the process of creating divisions (I call Triangular Thinking) we bring the divided parts together to create a collective. The first square for example has 4 squares but a fifth is acquired by adding the sum creating a bigger square. As we continue the same process is done to the next level of squares. There are 3 levels of squares and circles in this diagram. It’s good if you attempt to do it yourself but looking at the diagram you should be able understand how it all works. The Collective is a machine that is greater then the sum of it’s parts. It’s synergy, product and mechanical collective creates a perpetual movement that encompass the logic of individualism. Heaven on Earth is process of combining binary alpha 1 the square with binary Omega 0 the circle. In doing this we find divisions and segments of the petals which are produced to fill in the “gaps”. Petals are usually seen as products of a flower and thus the flower fills it’s gaps with petals as we do our very own products.

The Spheres of Heaven on Earth

Earth is Square

Heaven is Circle.

Ascension is Triangular Divisions.
GEOMETRY OF VINN DIAGRAMS PARADIGM

Alpha Squares are made for expansion.

Omega Circles are made for refining.

Crossway Triangles are made for divisions.

LOOKING AT THE SQUARES.

The 2×2 Square = 5 Squares is split in 2 divisions.

the 3×3 Square = 14 Squares is split in 3 divisions.

The 4×4 Square = 25 Squares is split in 4 divisions.

LOOKING AT THE CIRCLES.

The First 2×2 Circles = 5 Circles = 4 Base Colors = 4 Petals = 9 Potential Color Spheres

The Second 7 Circles = 7 BAse Colors = 6 Petals = 33 Potential Color Spheres.

The Third 19 Circles = 19 Base Colors = 18 Petals = 96 Potential Color Spheres

EXPANSION, REFINING AND DIVISIONS.

The Alphas are the smallest Squares.

The Beta are the collective of Alpha.

The Theta are the collective of Beta.

The Delta are the collective of Theta. and the sum of this final product.

THE DIVISIONS OF TRIANGULAR THINKING

First Level is Alpha Protocol the individual squares.

Second Level is Beta Protocol the first collective squares.

Third Level is Theta Protocol the second collective squares.

Fourth Level is Delta Protocol the final third collective squares.
THE CONVEYED MESSAGE:
“I wish for every man the highest potential for selfless unconditional love, and light to be the dominant force in every being. For man to be capable of rising to the highest dimensions in one life span.” These are my wishes.

What is the most important message you would like to share with the world right now?

You are not alone.

God, Universe and Truth.

The collective is the answer to God.

Selfless unconditional love is the answer to the Universe.

Truth is in dispelling mystification of warped information to become common knowledge.

As you race through space. Life is a spark in time. You are a grain in an hourglass.

There is no more an important place, time and thing as the now.

Live now and embrace your fate., however how temporary, eternal and experiential.

There isn’t enough time to think, just be! But we warned.

My silence is not ignorance. My calmness is not acceptance. My kindness is not weakness.

Patience is key to opening the right doors.

Don’t be a slave to the system. Work towards collective man yes, but don’t fall into illusion that we are because of what the tree of life makes us. We are not enemies in this domain, we are lost and just trying to adapt to the situation with our beliefs and mentalities to combat the dangers around us. We are trying to break free of the grip reality has over us. That our conscience is so much more then our skin, bones and brain. Our spirit carries on after we die, the body does not. But what we do here is either torment or memory of what we do right or what we do wrong in this life. These memories we make here is essentially what we take home to God the collective. It is important to note that what we do here is just as important as what the plans are for us in the after life.

Project heaven on Earth is a process of deconstruction, construction and integration. At the center of it is the knowledge of the solutions; god, universe and truth. Collective humanity, selfless unconditional love and demystifying knowledge of the truth. When all is done then will we be able to move to a better place; in body, mind and spirit.

“Knowing is not enough, you must apply. Willing is not enough, you must do.”

27 sided star, 9 pure ascendencies

**LIGHT, GROWTH:**

Deconstruction is the process of freeing us from disillusionment and breaking down mystifying barriers that cause something to be unmanageable and incapable of assessing. It is the process of quantifying and weighing what life is truly about and why we are living it. The roots, the causes, the circumstances and conditions of a situation. It’s events are what make the deconstruction important. Going to the source of the problem is the only way to deconstruct and compartmentalize a problem.

Construction is the process of finding positive purpose reason and function in life. Thinking positively and being active and functional in the development stages of life allows you to gain experiences and with experiences growth. Life is about growing and filling the space of life with your essence. Your activity, progress and growth fill in the gap that is the space that is essentially you. Constructive behavior is essential to the development of the body, mind and spirit. Therefore there is no true way to determine right to the best degree in the moments of development. just as long as it works. When the development constructive cycle is complete of course you are meant to function and produce products that work. That is fate, and that is where you shine.

Integration is the process of bringing it all together; The act of functioning is essential in bringing everything learnt now together as one. The process must be a precursor to inter-faith, where all religious ideas are mellowed, contemplated and easily assessed to be integrated into society. The ideas must be compatible with secular government. All things will be adapted and sorted out as all roles of religious, government and political elements are conceptualized and defined first. As we define and assess life we control entropy, when entropy is controlled it becomes order and when order comes we find the crossway which defines everything to it’s element. When we create these paradigms it gives us a vision of what we want to create.
LIGHT MASS:

Matter is the building block of its forms; Solid, liquid, gas and plasma. Matter makes form and allows substance to exist. The material things we enjoy in life are thanks to matter and it is in matter that we employ vehicles of technology to progress and save our time on Earth to develop more as humans. Matter has a low level of spiritual conscience and a subject to objectively but we should respect its function, purpose and reason for existing and thus not abuse its privilege of use. It is an object with lower end of priority for its wellbeing under plants, animals and other human beings. It is in the living sphere of the mineral. Matter is a component of the universe and an essential building block to life.

Energy is the power of the world it generates, potential, kinetic, static, electric, coal, oil, hydro, nuclear-fission/fusion, combustion, wind, thunder, gravitational, magnetic, harmonic, Positive, Negative, healing, natural, ki, perpetual motion of protons, electrons and neutrons. Other forms of energy are hybrid or hidden to the field of view to the 5 senses and may be acquired from another dimension or aspect of this world. Energy is the flow of life, it comes and goes and is a vector with direction. It may conduct, take shape and dispense, disperse and disappear. It can be found best in the elements of nature in its rawest form. It is through this energy that all things exist, the Earth is a life giving energy potential for sustaining lives and a life giving gift to all of us. We mustn’t let it go to waste and should take care of the Earth we live on.

Conscience is the heart of the world; in it, it generates purpose, function and reason for things to exist. The Human conscience is the thing that holds us higher then the animal kingdom. We can act out of instinct but we should know better then to act out of pure emotion without thought, repercussions and a plan. We should never act out of pure contempt, willingness to harm another or to cause infliction and destruction to another human being without contemplation. This is what we call our conscience; The circumstances, conditions and events that may follow because of our actions may cause us greater pain or suffering. There is always consequence in a person’s actions and the reaction is indeed undesirable if it comes to the darker end of the spectrum of humanity. Life is what it is, And things have a role in life no matter how lower in conscience they are in life. Taking another man’s life was never meant to be done by human judgement. In a case where it is, that man that died will never learn what he did wrong, opportunities to make it right are now impossible and the man who has done the judgement in killing will be tainted by the darkness of guilt – where it may consume him.
LIGHT EXISTENCE:

Nothing is absence of being; The quality of Ain Soph and Ain. The absence of god is not the entity that fills this void it is the void. It has not manifested yet and not even light has touched this space. It is the nothing beyond God, it existed before God as the Ain Soph Aur light and Kabbalah Tree of Life has. It is what God used to create the world of space. It is Absolute nothing, it means nothing or no place.

Everything is the state of existence where things exist. The quality of Ain Soph Aur. The boundless light manifesting a nurturing essence to bring life to all it touches. It is the beauty of creation, passion of productivity and flourishing of functionality that brings life into existence. The Ain Soph Aur idea is when you look beyond what the tree is, you see that even before the tree there is only light. Light metaphorically and abstractly through nurturing essence of Life, Grace, Hope, Faith, Redemption, Truth, Universe, God and Love. (The list is pretty endless because according to this idea anything that likens or is nurtured by light is part of the light body). It’s an inner communion with the eternal light that can heal and transform you, it’s not as simple as light itself from our relative perspective. If you think of Einstein and the state of relativity if you are traveling at the speed of light you would be everywhere in all time and space. When the world was created and the first light came into being the whole entirety of space and time were created and the experience was held simultaneously with that creation.

Infusion is the process of having both worlds of space and matter. This is the distribution of life and God. As you know your body is made of 99.9% space and you are composed of only 0.1 matter. It’s a very delicate balance of space and matter. The balance is made to distribute all life and essence of life at maximum potential, capacity and efficiency. We are made to function purposefully, experience life and express/generate love for one another. This is a reality of holographic proportions and the distribution of mass is minimalist for efficiency in the system. We as a human collective are a holistic proportion of the actual God experience. We are his memories in the existence of life, our struggles, circumstances, conditions and events all give him information as to “what if” a certain thing happened. Just like a super computer of unimaginable artificial intelligence calculating, assessing and producing ideas as to how to execute the best plan of action in certain lives, perpetual motions in life and methods of approach in life.

27 sided star, 9 pure ascendancies

LIGHT, ETERNITY:

Alpha is the first, the square geometrically. It represents Earth and the crude values of the physical. The Earth’s values are basic and unrefined but it is the template for which man’s spirit will be made. It is the Beginning of the binary and the initial binary that begins the sequence. It has the important role of leading the sequence to continue it as it is the initiating binary. Historically the Earth is represented by a square in the spiritual sense by the Platonic solids. With the edges described as rigid, unrefined and sharp. It is initiated by the number 1 or Square.

Omega is the last, the circle geometrically. It represents Heaven and the refined values of the spiritual. The Heaven’s values are smooth, complex and refined and is the ultimate form which man’s spirit will be made. It is the End of the binary and the initial binary that ends the sequence. It has the important role of ending the sequence to complete it as it is the final binary entry. Historically the Heaven is represented by a circle in the spiritual sense by the Plato’s sphere of heaven. With the edges described as smooth, complex and refined. It is initiated by the number 0 or circle.

Crossway is method of division between the two worlds. Signifying a great divide of forces of light and dark in it’s exchanges between the two realms. In this process they determine the identities of the entities that make up the light and dark from both the Heaven and Earth and access this information to judge those worthy of ascension. There will be those who are working for the system, against the system and there are those who will ascend above and beyond the system. The idea is that the crossway is a filter that works like a hourglass only letting one grain of sand in at a time. When it is your time you will fall through if you are worthy and have done your time and work on Earth. Humans can descend to less evolved forms of minerals, plants, animals, and other human incarnations but they can ascend to the heaven too to the world of Cherubim and Angels. Angels can fall from the higher dimensions and become (fallen angels/demons/nephilim). It is important to know that higher dimensional beings with high spiritual levels can become guardian angels when they cross the veil of death.
LIGHT, MANIFEST:

The Origin is the roots, causation and reason for something to become what it is today. You look at it’s roots and understand it’s beginnings. It is how the start of a journey begins and where everything came together to build the opportunity for life which is you. In this case origins is not only your own origins but the species of human, the origination of life itself, the origination of calculated creation of life itself through the placement of us in our solar system and our sun. For our origins is not a probability, in fact not only a process of refinement through evolution but hand in hand with a meticulously engineered creation of higher dimensional beings to enable our progression of the spirit in this world.

Substance is the general foundation of living, dead and non-living things. It is the existence of being of person, place or thing that dwells in this plane of life. Substance can be a very broad range of things such as things of mass are considered part of substance but what substance has also is; meaning, purpose and reason. It has benevolent values that encompass the entirety of the holistic system. It has a truth, justice and quality to it that very few paradigm platforms have.

Nothingness is the space that fills the cup. It is the space of an idea; It gives spokes created space a usefulness. A vase will have usefulness as an empty container to gather water. Nothingness is the essence of purpose in having emptiness. The world is full of space and that is why life flourishes. If life was all mass then everything would be too cluttered to breath, to move and collisions would be more frequent. Space is essential to life and for functionality of life. This is the lesson of Nothingness and it’s philosophy in a nutshell.
When one says The beginning is one means we are all born into this world as single individuals. We are brought into existence by our parents and as we develop our consciousness is only to think within our sphere of self development. We grow to become independent people and soon we are working to stand on our own two feet and feed ourselves and grow as a person. As we grow we come to acknowledge our peers, that they acknowledge us and we cooperate with them expanding our body of one to may be 2-10. The process may build up and we may build connections with these people to become a bigger group or body of people. Groups, potential business partners, ring of friends what ever you would like to call it.

When people say The End is All means we mean to say that in the end every human is connected and that whether we like it or not. All living beings are together in this no matter how difficult they may be and how tough the individuals ego and exterior shell is. We are human beings who are looking out for our own safety and the safety of others. All people is not the same as a collective of people but we must see the potential of what we are to become. If every individual were perfect and able to conceive the eternal truth and wisdom of God and universe then the possibility of Heaven on Earth would be easily obtainable. But this is not the case and everyone has their own agenda, motives and influences. Every being maybe selfish, explore selfishness to keep the dynamic going to gain revenue and distracted by physical world material things. Though no person can survive alone and once they are educated, or see that they cannot live as individuals in society alone it changes them to become more flexible and cooperative. This is not the true struggle.

The collective is the real struggle where we get everyone to cooperate and integrate on an inter-faith platform. There will be much conflict in the transition from being one to collective such as alienation and assimilation being the all to the collective. There will be compatibility issues with beliefs and interests. People will only do what they desire to do and it will be a troublesome process to get them to do the right thing. Troublesome but not impossible as we thrive for the best way through life; The collective is the holistic system working together and it is greater then the summation of it’s parts. The holistic system will create synergy, products and a mechanical process. It will bring new things to the table that will aid in building Heaven on Earth when the collective is established on Earth. The collective is a accessible, manageable and operating group of people who are comfortable with their own lives to allow another person to pilot their narrative because they share the same ideals, destination and customs. The collective is a system built on trust, faith and belief that they are all going to the same ideal place in their pictured mind. They envision and focus on getting to that destination as a group and each man is delegated his own post in their frontier in life working toward a collective ideally human cause.

27 sided star, 9 pure ascendancies
(These are the spiritual stages of the chart and therefore may become a little abstract, please relax and just understand that these concepts maybe due to my failure to articulate or your inability to grasp concepts that have not yet been learned yet. The acquisition of these terminology can only be acquired from the study of the main book; The God, Universe and Truth. It is recommended that you have a brief idea of what the Core, Transitions and Hourglass are before reading below for I do not know how much sense it will make to those without these background knowledge. I will articulate them best I can but no promises.)
LIGHT UNIVERSAL REALITY:

When I speak of Universal Reality I mean to say Virtual Universal Reality. The Core is the body of the virtual reality platform. It is the substance and meat per-say of the virtual reality universe. We have been working with three core, 3 transition, 1 hourglass, and 1 ascended protruding binary for majority of this journey. Today for our purposes the cores will be stacked high to whatever number is necessary to fit the diagram and so will the transitions. It will start looking like a Pizza Pie after it has been all cut out. In form I mean. Imagine the pizza as the core base covering the base of the hourglass structure. The color will be red pizzas. It’s function is to define a medium of it’s identity. For example my favorite would be a paradigm of physical, mental, spiritual and ascended binary (magenta crossing the middle). The Core is usually tied to the idea of a capacitor holding information/energy/power.

Now imagine separating “transitions” between the Pizza Slices so that you have individual slices not crossing the line of their territory. These are transitions and labeled blue most of the time. It’s function is mainly as a facilitator of walls to separate the core mediums from getting diluted/mixed into one another. For example to be consistent with the last set of cores we choose the transitions (physical) EMOTIONAL (mental) UNITY (Spiritual) DIVINE (Binary). The Transition is usually tied to the idea of a amplifier amplifying information/energy/power.

The hourglass structure is simply a double cone with a filter in the middle in the process to refine the medium coming through. The hourglass has been known to be an indicator of time and refinement through time. It is symbolic in this way and it also functions as an hourglass and represented usually as a intersecting of two planes/cones in this case. This is usually colored green. The Hourglass is usually tied to the idea of a fields usually a magnetic one because it’s the most basic.
LIGHT, VESSEL OF EXPERIENCE

Star is the beginning of the spectrum. I called it star because the single strands of light that borders the spherical shape are elements to my paradigm and the quantity of rays are reflected into how many trinity paradigms I can find. My usual number is 27 sided star with 9 ascendance values. They usually only go that high because I only work within the human area of ascendance. I tend to try to avoid the grey areas of the divine because I know there isn’t much I can do there in human form. The star represents dimensions of the x, y, z and time spectrum with their rays in every so directions. Star represents the 27 different ways the entity can shine even though there are different degrees and angles if the numbers are beyond 27. But generally 27 can be distributed on 3 platforms diagrams.

![Star Diagram]

Sphere is the end of the spectrum. I called it sphere because this shows the final development form refined to it’s potential. Spheres also describe the envelopes of fields within fields in the world of unseen benevolent field, creative field, morphic-resonance field, spectrum assessing field, activity field and state field. The fields don’t necessarily have to do with the actual sphere in this case but it is important to note the nature of these spheres. That they act like a polish Matryoshka Dolls that are inside of one another. The shells of the Earth is is another good physical example of what this sphere looks like. Earth is a living example of the sphere with its hidden spiritual fields and physical shells. There Sphere is the symbol of the divine and a metaphor for refined greatness. All records of shining ones have been tied to giant orbs of light. The manifestation of all wonderful and great things we idealize are of the light.
Proto-type is a monstrous paradigm of epic proportions because it also completes an ascended chart of its own and allows us to see up to 33 traditionally or more ascendant properties. 21 in which are protruding planar binaries and 12 are part of the ascended chart. This proto-type is just a means of producing something that can express a pure ascendant star ushering a movement towards higher consciousness and ushering a contemplative notion of amenity or relief for human suffering. It’s a “mad scientist” method of combine 3 stars and producing a pure ascendant chart. It was just myself testing the extent of the paradigms and attempting to take a peak in the veil of creation.

27 sided star, 9 pure ascendancies
God has a very vast spectrum but.. basically comes down to. The collective is the solution to the problem of god in the world. This is as simple as it can be put. There are many platforms God has been put under from a living deity (YHVH, Ehyeh Asher Ehyeh, Elohim and Allah) , to a demigod (Zeus, Hades, Poseidon), to a god in human form (Jesus). It is said that God has no form, that he is one with the universe and within people and that the consciousness within us is evidence of his spark of life. We all have a conscience and the ability to think with reason, purpose and function is more then enough to explain that we are a product of creation but complexly refined by generations of evolution and trait hand offs of genes. The Problem with Gods is that it must be one god or the people will be scattered and divided therefore the collective is the solution to the idea of God.

Universe is still a very broad spectrum of life but it basically comes down to. The selfless unconditional love of human kind will bring us together. No matter the divisions in the gender, ethnicity, sexuality, creed or religion if the light is strong in us we will adapt and find a way to form better structures and better rules for our people with the influences and guide of our peers. Things, people, places come and go but what is most important is what we have is each other. The families we build, experience and life that we build all make this possible. We are made to explore this world yes, investigate, experiment and find truths in the material world. Absolutely, but we also need to see that the truth is in selfless unconditional love and giving to those who cannot manage life alone because of their circumstances, conditions and events. Life will make a path for every man has in him the potential to do great things. And I feel one day I too will feel the accomplishment of doing something great as this work becomes testimony to what i will achieve.

Truth is a very narrow passage of life but the truth people want to know will be in this great demystification of the Christ. I believe in God, but probably not the same one you may believe in. I believe God in the universe and god in the collective of human beings. I believe the answer to the universe is for us as a people to act through selfless unconditional love. I believe that Christ had many lives, that he was a reincarnation of Thoth. That he was one of the architects to the Giza Pyramid, that he commenced the project that was the catalyst to the human evolution of consciousness. That he was an initiate for the Giza pyramid and said to meticulously design the pyramids for his future awakening. That under the identity of Jesu who also lived his lost years with the Buddhist monks written in the Manuscript of The Good Son; He sought enlightenment through them. That he brought Buddhist teachings back to teach his disciples. That Jesus actually lived two lives, one as Jesu who lived a admirable good life but stoned to death and also as Barabbis who was the political activist who is the etheric body of Jesus. He is the manifest of Christ the Son of God. Christ didn't even die at the cross according to these certain evidences and enigmatic suspicions (suspicious for the right reason) and actually lived a full and happy life with Mary Magdalene according to the Zacharias Rhetor under secret changed names. His survival is tribute to the knowledge that Christ did not die in 15 minutes at the cross. No he was sedated by a cloth put in his mouth that put him in a death like unconscious state. This is the reason why when they went to his tomb they brought aloe instead of funeral flowers. Aloe is used to heal wounds. They left no trace of where they went only the story that he ascended into heaven so that the romans could not chase him. Jesus and Magdalene lived full and happy lives, in the lost gospel Ecclesiastical History of Zacharias Rhetor under the pseudonyms of “Joseph” and “Aseneth”. Therefore I also do not believe in the resurrection sorry to say. This is the truth, Christ is still my savior but life must evolve we can all settle for this one truth that he may have come to bring us salvation but he had to live his own life too. The message that he was willing to sacrifice himself and did should be enough.
Unless you really wanted Christ to die then that just shows the type of human you are. Whether you are for the progress of human kind is in the decision whether you take this truth or not.

What if god is everywhere and your only destination is the now? What if he is everywhere and the only way to get to him is to know yourself better and initiate involution into the learning of self? The spark of creation is in you, you were never alone. God is always with us he’s a part of us and when we return home after our physical death he will collect us as information would to a brain and remember our good deeds and suffering. The reward of life is the experience.
